WHO WE ARE

Our Esteemed Customers

Permit me to use this opportunity to introduce and outline the capabilities, resources and services available from the company to the Oil & Gas Industry in Nigeria.

Since our inception in 1988, we have excelled in Wellhead Services, Wireline & Slickline Services, Mechanical, Instrumentation and Control, Civil, Electrical and Procurement Services.

Our workshop services includes pressure testing of several valves, pressure cavity checks, testing of down hole safety valves, servicing of flow line valves. We specialize in AVA, Baker Actuator, Vector Gray, Kvaener, Bean Boxes, Plug valves, Gate valves, Cum Unit etc.

Several International Oil Companies involved in Production as well as services including our local producers can attest to our worth.

We urge you to be with us and be treated to the best of our services.

Yours Truly,

Richard A. Ezo.

Chairman & CEO

WHAT WE DO

Our services and capabilities includes; Well Completion, Wellhead Maintainance, Wellhead Supply, Slickline and Coil Tubing, Electric Wireline, Tubing Conveyed Perforations (TCP), Pumping, Stimulation, Drilling System, Calibration and Pressure Test, Oil Tools Consultancy, Marine Services and Logistics, and Well intervention vessels.

MISSION STATEMENT

To sustain an innovative oil and gas servicing company with excellent customer service, creativity, integrity and social responsibility in the industry.

VISION STATEMENT

To effectively achieve the highest performance attainable across the oil and gas engineering business in Nigeria and beyond.

WELLHEAD

Aze Richy majors in the servicing, maintenance, pressure testing and installation of all types of wellhead and wellhead safety equipment. Having a team of seasoned wellhead engineers with a wealth of experience, the quality of our wellhead services cannot be over-emphasized. Our wellhead services includes the following:

- Servicing of Xmas trees
- Valve change-outs and bolting
- Well plugging/opening
- Maintenance, servicing/repair of valves
- Pressure testing, flushing of oil pipelines
- Work Over/Completions ToolsSub-surface equipment maintenance and servicing.
- Installation of Anti-theft nuts to secure Xmas tree and it's accessory.
- Installation of sub-surface safety valves.

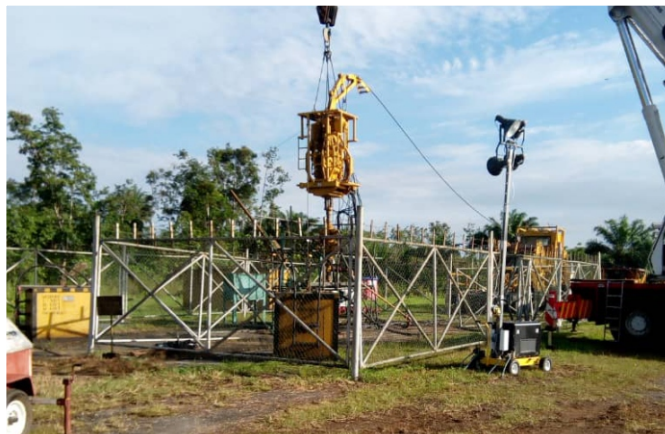

SLICKLINE / COILED TUBING

Aze Richy has acquired a comprehensive line of tools and equipment to render advanced slickline services to our wide range of clients. Using innovative technology, perforating, tubing punch and bridge plug setting backed up by industry recognized training and quality programs to ensure the highest level of personnel competency. Our Slickline units and cables are available in a range of styles to meet our clients' needs.

WE RENDER THE FOLLOWING SERVICES:

- BHP Analysis & Interpretation.
- Electronic Memory Gauge Rental.
- Sand Bailing
- Pulling & Setting of Subsurface Safety Devices
- Gas Lift Operations
- Swabbing
- Tubing Leak Testing
- Zone Change
- Wax Cutting
- Tubing Perforation
- Setting of Bridge Plugs & Packers without Pyrotechnics

PRESSURE TEST & CALIBRATION

Because every oil and gas project is a little different, every pressure test must be a little different. To perform the customised test required by our clients, we implement a pressure testing approach with outstanding flexibility in mind. We have the facilities and experienced personnel to provide world-class pressure testing at a cost effective price that would suit your budget.

Here our services are;

- Burst testing
- Hydrostatic testing
- High Pressure High temperature testing.
- Fatigue testing
- Cyclic testing
- Leak testing
- Proof testing
- Factory acceptance test
- site receiver test
- Fast Inspection of tool
- Check test.

MARINE SERVICES & LOGISTICS

Our well intervention Marine Services and logistics equipped barges that are specifically outfitted to deliver our bundled services in support of customers' need.
