

**AZE-RICHY
INTERNATIONAL
SERVICES LTD**

A large, complex white industrial wellhead or Christmas tree system is shown against a clear blue sky. The structure is composed of multiple cylindrical sections, valves, and pipes, with several large black handwheels for manual operation. The top section has a pressure gauge. The overall appearance is that of a high-pressure, high-temperature industrial component.

About Us

Incorporated on June 8th, 1988 under the Companies Act of 1968 (RC 113790), Aze-Richy International Services Ltd was founded by Sir Richard Aze Ezo following his distinguished 35-year career as a Wellhead Supervisor with Halliburton. Upon retirement, he established Aze-Richy in Port Harcourt to deliver specialized well intervention services. Within just nine months of operations with SPDC, the company emerged as the

first indigenous well intervention company in Nigeria — quickly becoming a trusted force in the industry. Over the years, Aze-Richy has expanded its footprint with branch offices in Warri and Lagos, alongside affiliate companies in Canada and India. Today, our services cover coil tubing, well completion, pumping, and project development, maintaining our reputation as a reliable partner in oilfield solutions.

Mission

To sustain an innovative oil and gas servicing company with excellent customer service, creativity, integrity and social responsibility in the industry.

Vision

To effectively achieve the highest performance attainable across the oil and gas engineering business in Nigeria and beyond.

Core Values

SERVICE

We deliver outstanding service that exceeds client expectations every time.

LEADERSHIP

We lead by example, setting industry standards through expertise & dedication.

INNOVATION

We embrace new ideas and technologies to drive better solutions.

RESPONSIBILITY

We act responsibly towards our clients, communities, and the environment.

GOALS

We set clear goals and achieve them with focus and commitment.

TEAMWORK

We work together, respecting every contribution and building collective success.

ETHICS

We conduct our business with the highest ethical standards.

TRUST

We build trust through transparency, honesty, and consistent performance.

RELIABILITY

We keep our promises and deliver dependable results, always.

QHSE

The quality and development of Aze-Richy's business are based on a certified system of quality management and control.

Our Quality Management System is designed in accordance with internationally recognized ISO9001:2015 standard and fulfills all requirements stipulated therein. Since 2018 the Quality Management System has been certified by PECB MS.

Our Services

Aze-Richy International Services Ltd proffer solutions for diverseneeds, from supply of industrial materials to the management of projects. We meticulously deliver services that meet our customers exactneeds. Our innovative spirit is obvious in every job we embark on. Over 30yrs of experience and achievements within the oil and gassersector.

Quality Policy

Aze-Richy International Services Limited is committed to consistent provision of quality Wellhead Maintenance Services, Slickline & Wireline Specialist, Coil Tubing Operations, Bottom Hole & Surface Equipment, Well Completion and Testing Equipment, Procurement and Supplies to our clients in the markets we operate. In other to achieve this, Aze-Richy International Services Limited top management has established objectives at relevant

functions, levels and processes of its business operations. We engage competent and self-motivated employees, modern day technologies and abide by customer, regulatory and statutory requirements in our business environment. We adopt continual improvement as permanent objective and review the performance of the quality management system from time to time to meeting changing needs in the environment we operate.

H.S.E. Policies

Aze Richy Int'l services Ltd implements comprehensive Health, Safety, and Environment (HSE) policies and procedures to ensure safe and responsible operations. These policies cover a wide range of areas, including risk management, environmental stewardship, and emergency response, with a strong emphasis on achieving Goal Zero – no harm and no leaks.

In addition to these core areas, Aze Richy HSE policies and procedures also address:

- + Occupational Health
- + Workplace Safety
- + Incident Reporting and Investigation
- + Regular Audits and Reviews
- + Collaboration and Knowledge Sharing

By implementing these policies and procedures, Aze Richy aims to create a safe and healthy work environment, minimize its environmental impact, and contribute to the well-being of the communities where it operates.

Aze Richy's HSE Policies & Procedures

Proactive Risk Management
Aze Richy prioritizes identifying potential hazards and implementing measures to mitigate risks associated with its operations.

specific procedures to ensure contractors adhere to HSE standards.

Environmental Stewardship
The company is committed to minimizing its environmental footprint and promoting sustainable practices.

Goal Zero Ambition: Aze Richy strives for Goal Zero, aiming for no harm and no leaks in all its operations.

Emergency Preparedness
Aze Richy has robust emergency response plans in place to effectively manage potential incidents.

HSE Competence Training
Aze Richy provides HSE training to its employees and to enhance their knowledge and skills in safety management.

Contractor HSE Management
Aze Richy recognizes the importance of contractor safety and has implemented

HSE Management System
Aze Richy has a comprehensive HSE management system in place, aligned and certified with international standards like ISO 14001 and ISO 9001:2015.

Wellhead Engineering & Maintenance

At **Aze-Richy**, we deliver comprehensive wellhead maintenance and completion services designed to keep your operations running safely and efficiently. Backed by over 30 years of proven expertise, our team of seasoned engineers and technicians bring unmatched skill and dedication to every project. We pride ourselves on providing high-quality, cost-effective solutions tailored to meet your specific requirements and standard operating procedures. From challenging onshore fields to complex offshore environments, our well-trained

specialists handle even the toughest wellhead conditions with confidence. Our capabilities cover a wide range of wellheads, chokes, and valves—including industry-leading brands such as Cameron, Vetco Gray, FMC, and Kvaerner. With every project, we leverage our deep industry knowledge and practical experience while respecting the unique logistics, community, and site demands of each location.

Partner with Aze-Richy—where reliable wellhead performance meets decades of proven excellence.

We Supply

- + Supply of wellhead accessories
- + Supply of anti-theft nuts and keys
- + Supply of all kind of wellhead valves
- + Supply of drum lifters
- + Supply of Xmas tree spools of various sizes
- + Supply of well completion accessories

Our Areas of Expertise

- + Preventive and Corrective Maintenance (1st and 2nd Line Maintenance)
- + Installation & Maintenance of OEM Wellhead Equipment & Accessories
- + Tool Rentals: Lubricators, X-Overs, Drilling Spools/Adapters, Running and Retrieving Tools of Various Sizes
- + Design, Supply and Installation of standard Anti-theft nuts
- + Well Securing Using Standard & Side Door Lubricators
- + Repair and Installation of Wellhead & Accessories
- + Repair and installation of chokes and valves
- + Pneumatic & Hydraulic Bolting Services
- + Installation & Retrieval of Wear Bushing
- + Installation/Retrieval of Test Plugs
- + Wellhead Completion

Slickline Operations

Aze-Richy is equipped with a comprehensive suite of slickline tools and equipment to deliver advanced slickline services for a diverse client base. Leveraging innovative technology and industry best practices, we offer services including perforating, tubing punching, and bridge plug setting—ensuring precise, efficient well interventions every time. Our slickline operations are backed by

internationally recognized training and robust quality programs, guaranteeing the highest level of personnel competence and service reliability. With a wide range of slickline units and cables, we tailor each operation to meet your specific well requirements, delivering solutions that keep your production flowing smoothly.

We Offer

BHP Analysis & Interpretation - We deliver accurate Bottom Hole Pressure analysis and clear data interpretation to optimize well performance.

Electronic Memory Gauge Running - We run and recover electronic memory gauges to capture precise downhole data for informed decisions.

Sand Bailing - We provide efficient sand bailing services to clear wellbores and maintain smooth production flow.

Installation & Retrieval of SCSSV - We expertly install and retrieve Surface Controlled Subsurface Safety Valves to ensure well safety and integrity.

Memory Gauge Interpretation - We interpret and analyze memory gauge data to help you maximize well efficiency. Gas Lift Valve Installation/Change-Out: We handle gas lift valve installations and change-outs quickly and safely to boost well productivity.

Wax Cutting - We remove wax deposits efficiently to restore

optimal flow in your wells.

Swabbing - We perform swabbing operations to safely kick off wells and improve production rates.

Zone Change-Out - We carry out precise zone change-outs to enhance reservoir performance.

Tubing Leak Testing - We provide accurate tubing leak tests to detect and resolve issues promptly.

Setting of Bridge Plugs and Packers - We expertly set bridge plugs and packers for secure well isolation and interventions.

Fishing - We deliver reliable fishing services to recover lost or stuck downhole equipment.

Downhole Shut-In Tool Services - We deploy downhole shut-in tools to safely isolate wells when needed.

Coiled Tubing Operations

Aze-Richy's Coiled Tubing services enable thorough tubing well interventions, including rigless operations, completions, and live well interventions—delivering safe, efficient solutions without the need for costly rig mobilization.

It's applicable in:

- + Circulate fluids
- + Workover with mechanical tools
- + Data Acquisition
- + Drilling

We Offer

Rigless Operations - We perform well interventions without the need for a rig, saving time and reducing costs.

Completions - We use coiled tubing to support efficient well completions and cleanouts.

Live Well Interventions - We safely carry out interventions on producing wells without shutting them in, minimizing downtime.

AZE-RICHY
INTERNATIONAL
SERVICES LTD

Wireline Operations

We provide comprehensive wireline services that support the safe, efficient, and cost-effective maintenance and intervention of oil and gas wells throughout their lifecycle.

Our Capabilities

Logging Services - We deliver high-quality open-hole and cased-hole logging to gather critical downhole data for informed decision-making.

Perforation - Our precision perforating services ensure optimal reservoir access and well productivity.

Setting & Retrieval - We expertly set and retrieve plugs, packers, bridge plugs, and other downhole tools to support well operations.

Pipe Recovery - We offer reliable pipe cutting and recovery services to handle stuck pipe situations safely and efficiently.

Well Integrity Checks - We carry out leak detection, pressure monitoring, and integrity testing to maintain safe well conditions.

Fishing Operations - Our team recovers lost or stuck equipment with minimal downtime to restore well operations quickly.

Calibration & Pressure Test

To meet our clients' specific testing requirements, we deliver highly flexible pressure testing solutions. Backed by state-of-the-art facilities and skilled professionals, we provide world-class pressure testing services that are both cost-effective and budget-friendly.

We Offer

Burst Testing - We offer burst testing to verify that your equipment can safely handle maximum pressure limits.

Hydrostatic Testing - We provide hydrostatic testing services to check for strength and leaks in pipelines and vessels.

High Pressure Testing - Our high-pressure testing ensures your equipment performs reliably under extreme pressure conditions.

Temperature Testing - We carry out temperature testing to assess equipment performance across various temperature ranges.

Fatigue Testing - We conduct fatigue testing to determine how repeated stress affects the lifespan of your materials or components.

Cyclic Testing - Our cyclic testing simulates real-world operational cycles to verify durability and performance.

Factory Acceptance Test (FAT) - We perform FATs to confirm equipment meets design specifications before delivery.

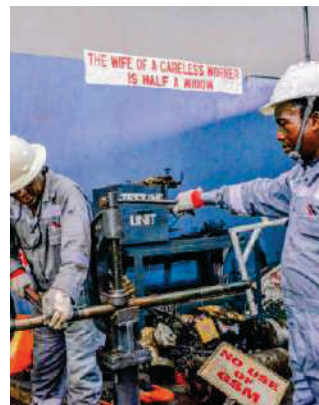

Site Receiver Test - We carry out site receiver tests to ensure proper equipment function after installation.

Fast Inspection of Tool - We offer quick tool inspections to guarantee safety and readiness for use.

Check Test - Our check tests verify that systems and components meet all required standards.

Leak Testing - We conduct leak testing to detect and prevent leaks in your systems and pipelines.

Proof Testing - We provide proof testing to demonstrate safe operation at specified pressures.

Marine Services & Logistics

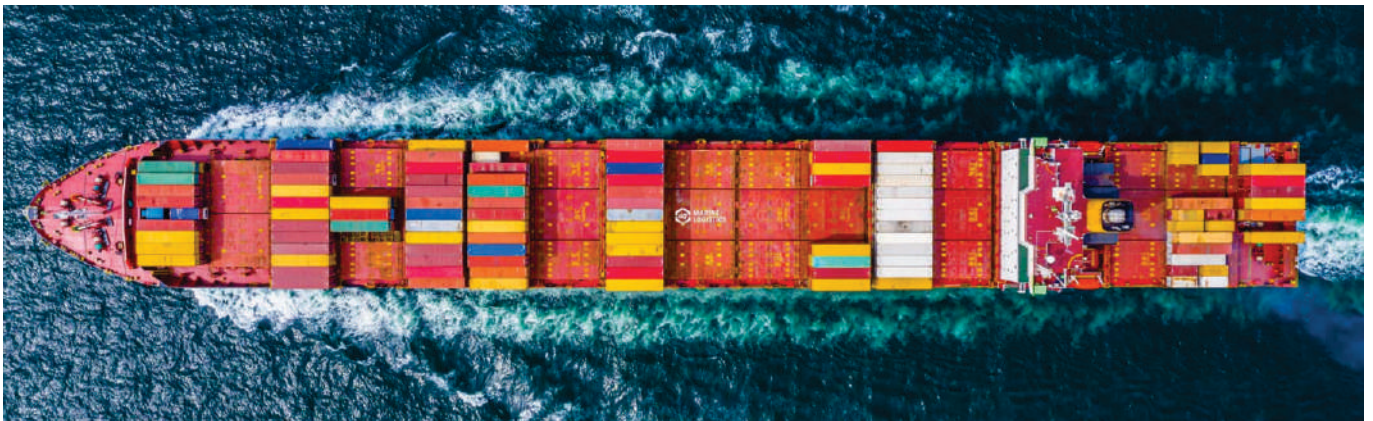

We provide end-to-end marine and logistics services designed to keep your operations running smoothly, efficiently, and safely — whether onshore or offshore.

Marine Services

We offer reliable marine support services tailored to meet the demands of offshore and coastal operations. Our fleet and skilled personnel are equipped to handle vessel chartering, offshore supply runs, crew transfers, equipment transportation, and marine coordination with the highest safety standards.

Logistics Services

Our logistics solutions cover every stage of the supply chain. We handle procurement, storage, inventory management, cargo handling, freight forwarding, and on-time delivery, ensuring your materials and equipment reach their destination securely and on schedule.

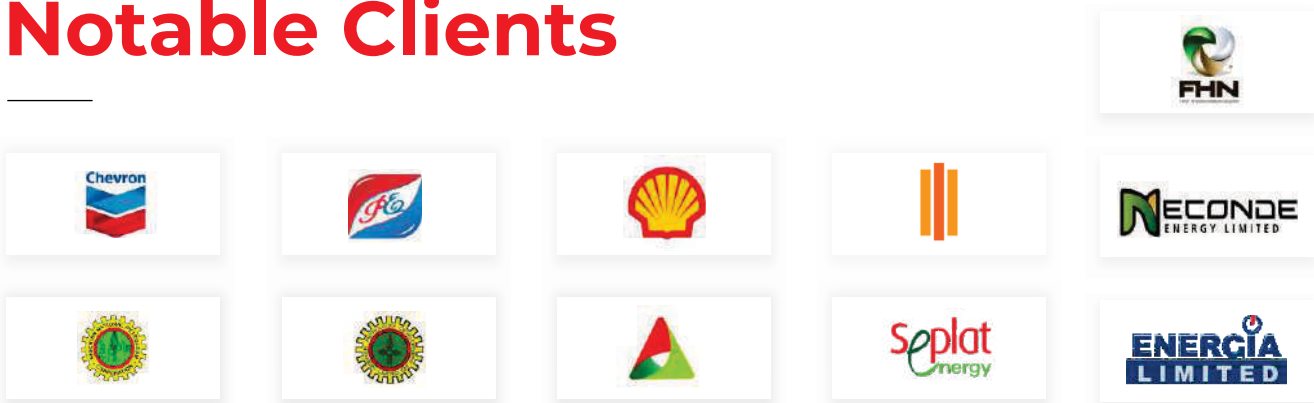

Work History - Excerpts

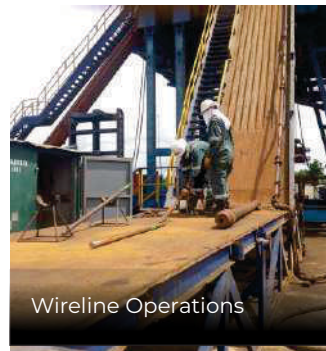

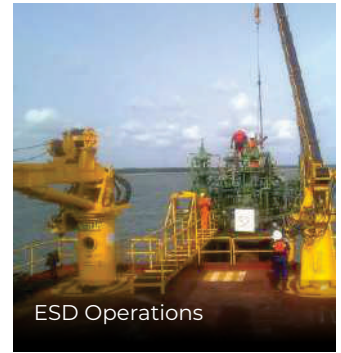

Over the years, we have had the privilege of delivering our services to a diverse range of reputable clients across the industry. Below is a list of few of the valued clients we have proudly worked with.

Service Provided	Client	Year
Provision of Wellhead Services (Well completion operation)	NPDC & NDW	2025
Wireline services (Pipe recovery operations)	HEQSL	2025
Wireline services (Cement Evaluation & Proforation)	HEQSL	2025
Provision of Wellhead services (FLM)	SE	2025
Provision of Wellhead services (Well test operation)	NPDC & NDW	2025
Provision of Wellhead services (ESD Monitoring)	NPDC & NDW	2024
Provision of Wellhead Maintenance Services in OML30	NPDC	2023
Provision & Installation of Anti-Theft Nuts on Wellheads & Xmas Tree	NPDC	2022
Provision of Coiled Tubing De-waxing Operation	HEOSL	2018
Well Services, Slickline & BHP and Wireline Intervention	HEOSL	2018
Slickline Operationon Well 7s and Replacement on Damage SCSSV Packing	NPDC & FHN	2017
Contract for the Revamp of Jones Creek Wellhead	NECONDE	2015
Contract For The Preventive Maintenance of NPDC Wellheads	NPDC	2014
Procurement of CCU & Provison of Wellhead Maintenance Services	Seplat	2013
